

Magento Extension **SMTP**
Version 1.0.0
USER GUIDE

Last update: Aug 19th, 2013

Overview

1. [Introduction](#)
2. [Installation](#)
3. [Configuration](#)
4. [Troubleshooting](#)
5. [Contact us](#)

1. Introduction

This extension allows you to use custom SMTP host.

Features

- Custom SMTP server usage
- Custom port, secure protocols support

2. Installation

Clear the store cache under **var/cache** and all cookies for your store domain. Disable compilation for Magento 1.5+. This step eliminates almost all potential problems. It's necessary since Magento uses cache heavily.

Backup Your Data

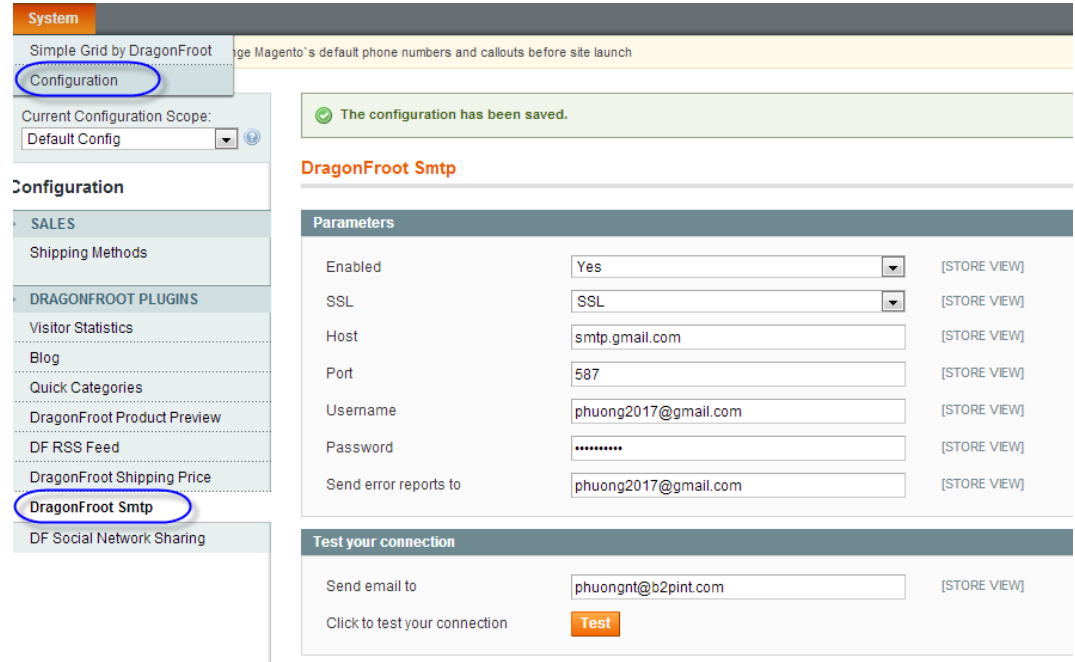

Backup your store database and web directory.

Download and Extract

Download and unzip extension contents on your computer and navigate inside the extracted folder.

3. Configuration

Back-end

System

Simple Grid by DragonFroot

Configuration

Current Configuration Scope: Default Config

Send error reports to	phuong2017@gmail.com	[STORE VIEW]

Test your connection

Send email to: phuongnt@b2pint.com [STORE VIEW]

Click to test your connection **Test**

Go to the **System > Configuration > DragonFroot Extesions > DragonFroot Smtp** page at the backend and set up the options you need:

Enabled - if "No" is selected, native Magento mailer is used

Host, Port, Username, Password, Protocol - define these settings with proper data if you want to use external SMTP host

4. Troubleshooting

After the extension installation the store gives an error, or blank page, or suggests to start Magento installation procedure.

Change the owner of the extracted extension files to the web server user and set 775 permissions on them. Clear the store cache and try again.

There is no DragonFroot extensions under my configuration section, or having the extension tab clicked I get a blank page, or Access Denied error.

Clear the store cache, browser cookies, logout and login again.

I've set up everything correctly, inserted the HTML code but there is nothing on that page.

Clear the store cache, clear your browser cache and domain cookies and refresh the page.

My configuration changes do not appear on the store.

Clear the store cache, clear your browser cache and domain cookies and refresh the page.
